

Highlights

- First probabilistic Lago-protocol EPF benchmark on JEPX (Japan).
- Ten forecasters across Tokyo & Kansai, day-ahead & imbalance, 305-day test.
- Zero-shot Chronos-Bolt matches the strongest supervised model on every cell.
- Hansen-Lunde-Nason MCS singleton on Tokyo IM contains only Chronos-Bolt.
- Open per-issuance prediction matrices released for reproducible follow-on work.
